ISFAHAN

The City of Turquoise Domes

As a big city in the heart of Iran, Isfahan welcomes you with great historical as well as scientific centers. Isfahan, the cradle of culture and art, contains the most important immortal works of Islamic architecture and many beautiful mosques, sparkling like a jewel among the cities of Iran. Furthermore, it is the adopted sister of many of the most famous cities in the world. In the other hand,

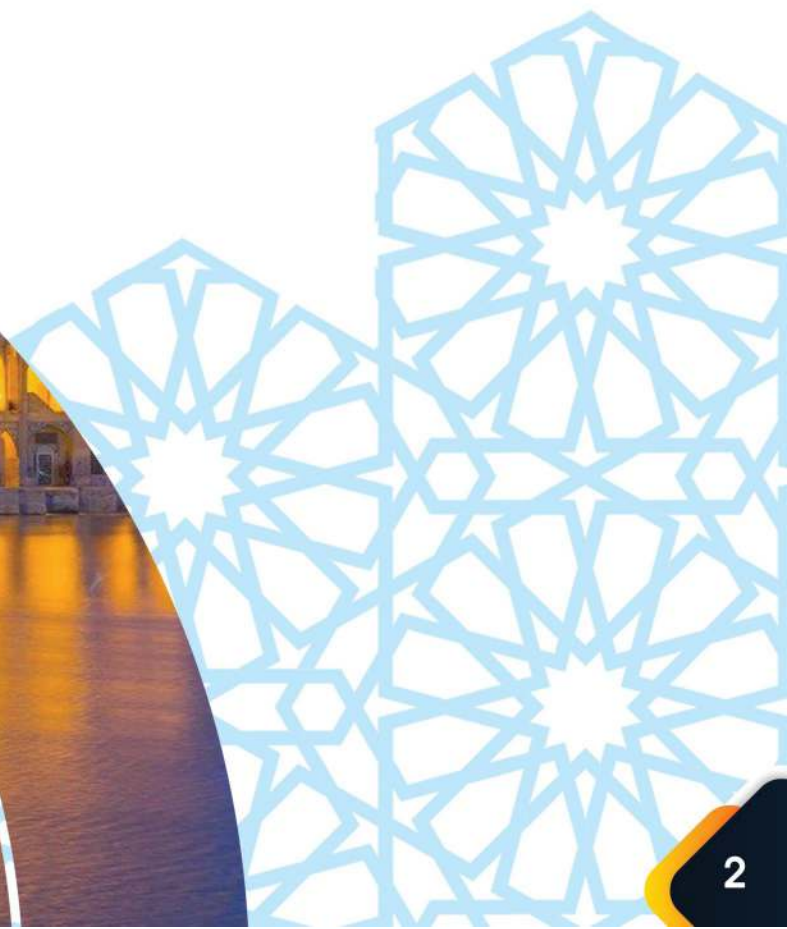

Isfahan is a unique city in the world

This charming city with kind and hospitable people annually receives a large number of foreign visitors due to having the well-known tourist's attraction. Visiting various historical, cultural and recreational places along with large and modern shopping centers will be a unique experience in your life.

The city is also known as the blossomed rose, earthly paradise, turquoise bridge, museum city, Persian Florence, etc. these are only some titles given to Isfahan to glorify and appreciate its grandeur. The name of Isfahan comes always along with Zayanderud River, the largest river of the Iranian Plateau in central Iran.

This mysterious City

Apart from all the unique features, living in the amazing city of Isfahan, of course, has its own advantages.

▶ Beauty

Among the cities of Iran, Isfahan has the most number of UNESCO World Heritage Sites and therefore it would not be surprising that it carries the nickname “Half the World”. To this day, the city is resplendent with magnificent mosques, rich bazaars and picturesque gardens. Based on writing by the French author Andre Malraux, only Florence and Beijing are comparable to Isfahan.

▶ Food

The city is not only distinguished for its historical sites, but it also has traditional and fragrant dishes that can double the enjoyment of being in Isfahan. When it comes to food, Isfahan is no slouch either and along with a range of delicacies that can be found throughout Iran, the city is also home to several regional delicacies.

▶ Art

For centuries, Isfahan has been a cornerstone of handicrafts and traditional arts, which is easily accessible when visiting the city and its magnificent monuments. The same mastery is so delicately applied to Isfahan handicrafts, which encompass a wide range of arts such as carpet weaving, engraving, miniature, tile work, and inlaid work.

Lovely Weather

Besides, Isfahan is a city with regular seasonal changes in which international students can experience a moderate climate. If you are looking for a cool, neither too cold nor too hot, weather experience, migrating to Isfahan is a great option.

Modern Isfahan

Isfahan boasts about a range of modern sites while at the same time, keeping alive the ancient memory of historical places. The city has made significant progress in recent decades. It has acquired the face of a modern city by increasing its population, expanding new areas and streets, buildings, and factories.

Top reasons that make Isfahan a great place to Study

International students prefer to choose Isfahan as their academic destination. Our exquisite city is the best place for academic programs, and it simply gives the students the tools to excel.

- Affordable cost of living and schooling
- An amazing academic opportunity
- A world-class education
- Scholarships
- Student-friendly
- Cleanliness
- High standards of living
- All kinds of welfare facilities
- Hospitable people
- Different public transportation
- Safety

Definitely, there are infinite reasons to go for Isfahan.
TRUST US, YOU WON'T REGRET

MEDICAL UNIVERSITY of ISFAHAN

Medical University of Isfahan (MUI) as a prominent educational and research institute of tertiary education in Iran is of interest to many young people not only in the Middle East but also in the world, offering excellent academic training and mentoring within a supportive environment.

The University has a valuable socio-cultural background in medical and health scientific development and uses innovative techniques as well as state-of-art equipment to provide a positive atmosphere for students and scholars to grow and become the next health and medical leaders.

As an internationally accredited university, MUI is devoted to providing high-quality programs and services to its students. It seeks not only to assist students to fulfill their education but also has a long-lasting impact on their life skills and abilities.

The new academic year has begun in such a way that all the world lives in the threat of pandemics and is worried about the deathly Coronavirus spread.

Although this terrible pandemic has caused many deaths around the world, we will emerge from this battle wiser and stronger than before. Empathy, respect for the rights of others, greater attention to the vulnerable, and promoting personal health are just a few lessons that this situation has taught us. Also, education has not been far from these improvements, and a new chapter has arisen in the way of training throughout the world. Over the last decade, e-Learning has grown exponentially. It comes in many forms, but it is primarily used for college education, certification training, and professional development. It also allows everyone to continue their scientific advancement in a safe place, and it is the common language that brought all the world's universities back together at a common starting point. Medical University of Isfahan, with the help of its infinite distinguished professors, could perform well in this field, and the educational process has not been suspending in this pandemic. The presence of international students at this university creates a platform in which we can communicate with different cultures.

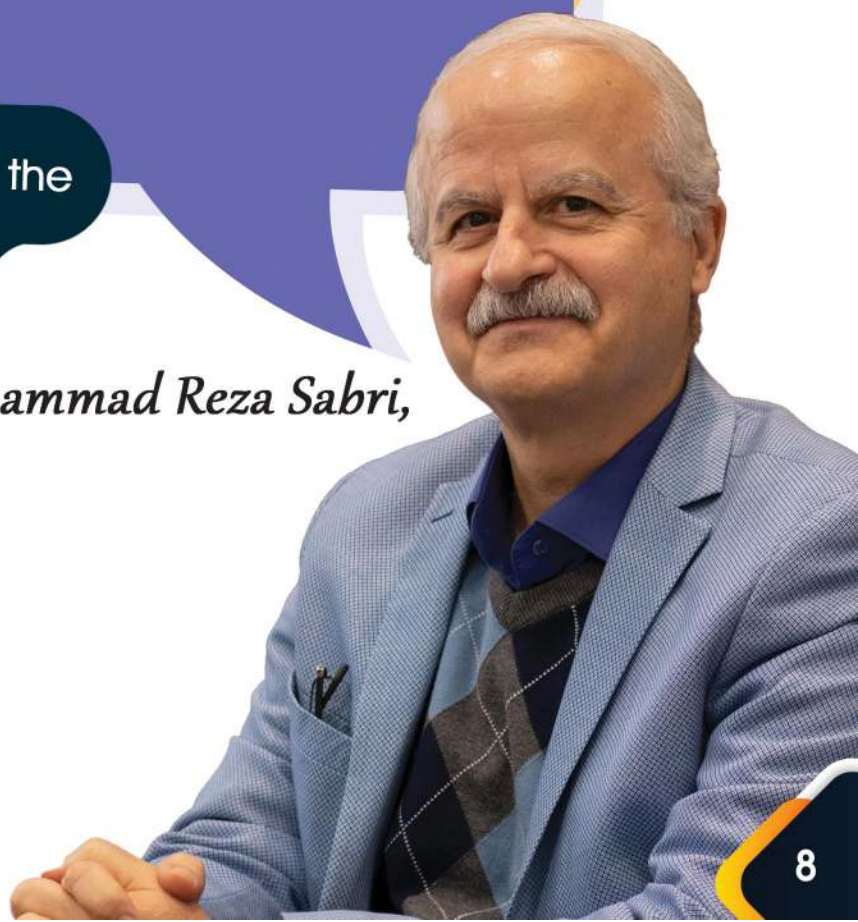

I hope they will always remember the first time they walked up MUI and will cherish the friends and the memories they have made during their years at this special campus.

We are looking forward to seeing you in the upcoming semesters at the Medical University of Isfahan.

A Message from the

Vice-Chancellor
of Education

*Prof. Mohammad Reza Sabri,
M.D.*

Honors and Rankings

Understanding what we have achieved, where we are, and how we can improve is vital not only to the MUI administration but also to the view of our prospective students. Honors and rankings are ways to demonstrate the University's performance and prestige. Success in gaining reputations and positioning MUI nationally and internationally, for us, is about how we are able to become as good as we really can be.

- Four faculty members of MUI are among the top 1% scientists in the world.
- The school of Nursing and Midwifery ranked first for seven consecutive years among all Iranian universities.
- Both the Schools of Medicine and School of Dentistry are among three top faculties school in Iran.
- MUI possesses a WHO collaborating center; Cardiovascular Research Institute, for the prevention, control, and rehabilitation of cardiovascular diseases in the Eastern Mediterranean Region.
- MUI faculty members are awarded more than 10 major international grants.
- It has been succeeded to be one of the top universities in the implementation of the operational plan among the universities of Iran.
- It is the top Iranian college in evaluating educational processes.
- The last but not least, success in the Times Higher Education (THE) World University Rankings, which is a vital resource that provides the definitive list of the world's best universities.

**World university
rankings 2021**

**Impact
rankings 2020**

**Asia university
rankings 2020**

Medical University of Isfahan has participated for the second time in THE and received good ranks among universities of Iran especially in medical sciences.

- Among the one thousand evaluated universities in the world, MUI has been placed between the 801st and 1000th.
- Ranked 7th in the World University Rankings 2020 by subject: clinical, pre-clinical and health, with the score of 601+ among Iran's medical universities.
- In THE Impact Rankings 2020, MUI was 2nd rank with 401-600 scores among medical universities in Iran and ranked 101-200th in the section related to the goal of Good Health and Wellbeing.

EXPLORE IMPACT RANKINGS FOR INDIVIDUAL SDGS

OVERALL RANKING	1 NO POVERTY	2 ZERO HUNGER	3 GOOD HEALTH AND WELL-BEING	4 QUALITY EDUCATION	5 GENDER EQUALITY	6 CLEAN WATER AND SANITATION	7 AFFORDABLE AND CLEAN ENERGY	8 DECENT WORK AND ECONOMIC GROWTH

FACILITIES

Dormitory

Are you looking for a comfy place to stay in?
Then we offer you the MUI dormitories.

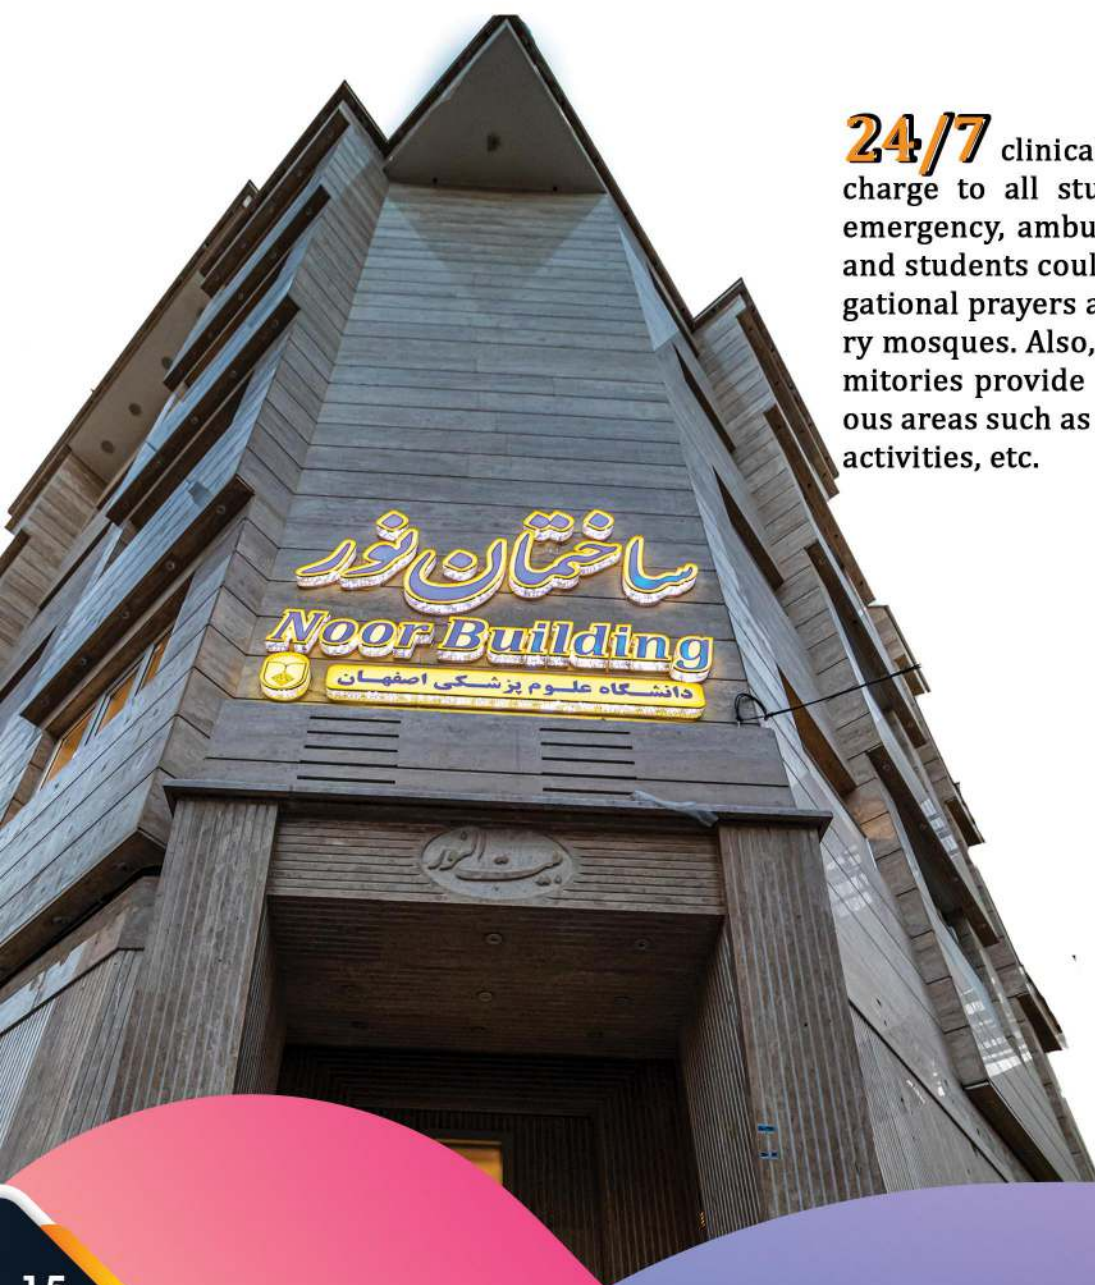

Since accommodation has been always one of the most significant concerns for foreign students, MUI has established two dormitories named Noor and Baharestan that are well equipped and provide a safe and convenient environment with suitable facilities for international students to develop their social maturity.

Not only do the dorms give an assurance that they offer a calm place located in the best parts of the city but also have easy access to shopping malls and medical centers. All dormitory buildings are easy to reach the university using public transports; however, MUI students are supplied with a free transportation system. A fleet of buses transfers students from dormitories to all school premises on the campus.

All rooms have separate bathrooms and water closets and special places for washing dishes. A library, sports facilities, and two kitchens are among the other facilities that have been provided at the dormitories. Students can choose their favorite room for accommodation based on their budget.

24/7 clinical services are available free of charge to all students. These services offer emergency, ambulance, and general dentistry, and students could benefit from them. Congregational prayers are regularly held at dormitory mosques. Also, counselors based at the dormitories provide students with advice in various areas such as education, marriage, cultural activities, etc.

Sport

Should students forget to do exercises during their studies? At MUI, the answer is definitely NO.

The university offers a wide variety of sports facilities to its students, from instructional and recreational, to competitive. Those who wish to compete seriously can join a sports team while there are also other activities primarily for fun and enjoyment. Our students can choose their favorite activity among 22 indoor sports including ping-pong, basketball, badminton, handball, volleyball, tennis, futsal, fitness, cycling, martial arts, and aerobics which are accessible at the university campus and dormitories.

Additionally, there are opportunities to take part in a broad range of fitness activities, from Zumba and Pilates to bodybuilding and working out in high-quality, affordable gyms. There is also a 25-meter swimming pool with six lanes, steam and dry saunas, and a Jacuzzi, hosting a variety of different events throughout the year.

At the university, students can enjoy open-air sports facilities (grass soccer fields, hard soccer fields, volleyball, basketball, and tennis courts, and carpet soccer fields) which are available for outdoor sports such as soccer and track and fields.

Dining halls

Does MUI have the best dining halls?

This might not be the most important question students should be asking when putting together their application lists, however, it is not a trivial concern, either. Realizing that campus food will form the majority of students' diet for the following years, it is worth considering what that will look like, from the variety of options available to nutrition content and dietary restrictions.

There are two dining halls and a private restaurant that provide peaceful and memorable moments for students by serving different types of foods. Their featured menu includes the best quality ingredients of favorable Iranian and international foods. Typical Iranian main dishes are combinations of rice with meat, vegetables, and nuts. Herbs are frequently used, along with fruits.

These halls have the following facilities:

- Reservation system with the capacity of purchasing credit via automation system and website
- An improved method for grilling Kebab with less heat and less smoke
- Cooking rice by semi-industrial and steaming method, with less oil and less waste
- Automatic Kebab skewer, not using hands in making Kebab
- Steel containers: More durability and simple washing
- Two menus, for choosing a meal by the students

Libraries

Are you looking for a fantastic library to study in?

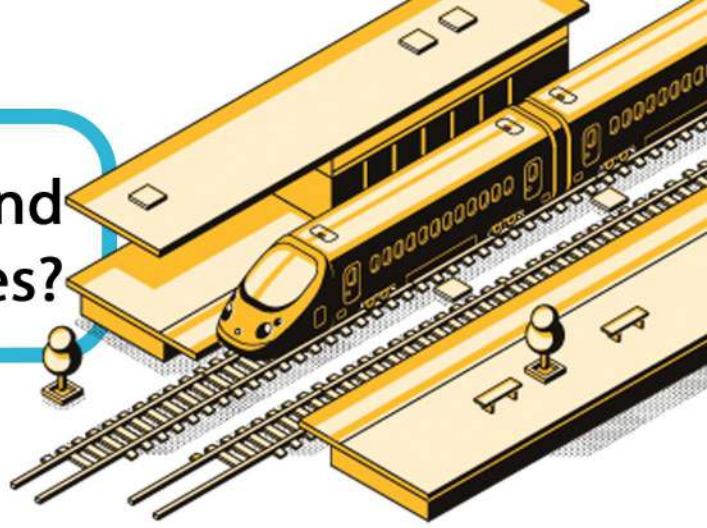

Then look no further than MUI libraries. Our nine libraries offer outstanding learning experiences as well as marvelous campus views and also provide stunning and rare reference books. MUI libraries are designed to assist physicians, health professionals, students, medical researchers, and information specialists in not only finding health and scientific information to improve, update, assess, or evaluate health care but also increasing importance to teaching and doing research. They have rooms for overall more than 175,000 different resources to serve the medical interests of our students. Library staff is on hand to support your learning and help with queries.

These Libraries are specialized for medical sciences, offering learning spaces to meet a variety of needs, from silent or quiet study to social and collaborative learning. They provide an extensive collection of scholarly resources including books, eBooks, print and journals, as well as databases, collections of early historical books, and primary digital archives.

Moreover, as we are attempting to preserve the record of medical knowledge and provide services that are more efficient to physicians and scientists through mechanization, we have initiated our digital library to have access to the most credible medical databases online.

Transportation

How do students get around the campus and others places?

MUI has a free in-campus transportation system at the service of students and staff. To get around the city, there are several budgets transportation systems such as public buses, BRT, taxi, subway, and public bikes. Two Metro stations adjacent to the university campus serve the students to the various parts of the city.

Health Center Services

The medical health and treatment center for students located in the complex of the halls of residence includes a general medicine unit, nursing unit, vaccination unit, dentistry unit, environmental health unit, and pharmacy. To promote health, it is rendering services to the students in the morning shift, during the office hours, and in the evening shift from 4 pm to 10 pm, every day. Also, an ambulance is ready round-the-clock for dispatching the patients who need advanced medical treatment services.

To maintain a comprehensive health record for each student, the University provides documentation according to current nurse practice and medical standards. Thus for MUI students, a health record is compiled to improve patient and provider interaction, reduce medical errors, and support safer care.

Hospitals

University-affiliated teaching hospitals are fully equipped and provide great opportunities for students to acquire clinical skills at all levels. MUI has 10 teaching hospitals specializing in Trauma, Burn, Cardiology, Ophthalmology, Pediatric, OB/GYN, and Hematology, Oncology and Radiotherapy. Al-Zahra hospital as the biggest hospital in Isfahan is located on the university campus and affiliated with the School of Medicine, making significant contributions to educating the caregivers of tomorrow. Over the years, generations of committed individuals have dedicated their careers to achieving the vision of being the best community teaching health care system in Isfahan.

Moreover, as we are attempting to preserve the record of medical knowledge and provide services that are more efficient to physicians and scientists through mechanization, we have initiated our digital library to have access to the most credible medical databases online.

Application Information

Students from all over the world join MUI annually with the drive to succeed, and choose it as their academic destination to make their university experience unequalled. Interestingly enough, the number of international student has soared in our most recent intake, which is attributed to maintaining a high-quality education, welcoming environment, as well as promising graduate prospects.

Medical University of Isfahan offers a wide range of higher education qualifications at the levels of undergraduate, postgraduate, specialty, subspecialty, and fellowship. Further to the internationally accredited curricula, there are a number of short-term courses, visiting programs, as well as online courses in which international students have the opportunity to partake.

Prospective students with a strong interest in medical sciences and health can apply directly on the website: www.iedu.mui.ac.ir. After reviewing their documents, they will be invited for an interview and a letter of admission will be issued after the interview. Applying to study at MUI is competitive and merit-based, and the University offers scholarships up to 100% for education fees as well as accommodation and transport according to the candidates' mark sheets.

We look forward to welcoming you to the Medical University of Isfahan, and would like to do everything we can to make the admissions process easy to navigate.

Educational
background

What has MUI done in the Coronavirus pandemic?

The Coronavirus pandemic has universally influenced educational systems, leading to the closures of universities all across the world. With the distinctive rise of e-learning, teaching is undertaken remotely and on digital platforms.

Medical University of Isfahan not only has considered the condition and established a functional education system, but it has also managed to reinforce the communication and telecommunication substructure. Our aim during this difficult and confusing time has been to support our students with what we do best. So, they can feel confident and be sure there will be no problem in this regard and could easily continue their education with no concern.

To achieve this, the University Academic Learning Management System (NAVID) is used to provide courses in the form of audio PowerPoint files, small educational videos, and file types. Making a panel of conversations, assignments, testing, reporting, and providing feedback to colleges to improve the quality of courses are other capacities of this system that allows virtual education asynchronously. Moreover, professors mostly use Adobe Connect and Skyroom to hold their classes online so that the students can benefit greatly from questioning the professors and use the curriculum and course plans easily.

Development of the university's virtual learning studio with modern and advanced equipment such as the highest quality sound recording equipment, advanced video, lighting equipment, Full HD cameras, lapel microphones, independent sound recording microphones, modern possibility of live internet broadcasting, control room with advanced hardware and software, recording and editing audio and video is another activity of the University for remote course delivery.

”

For anyone curious to know what MUI is about, I would humbly recommend them to come visit and see for yourself as for others seeking an insight, I hope this will help appease your curiosity. When I was 11, I got obsessed with Iran and its rich Persian culture, everything from its traditions to its music intrigued me greatly and with some strange twist of luck I found myself not only in Iran but in the very hub of its cultural history, Isfahan. Here at MUI resides a whole world preserved and fostered by some of the most distinguished guardians this pristine institution has to offer. It's a symbol of excellence but at the same time a very valuable repository of memories. The lush green lawns in the campus, the cafeterias, the tennis courts, the meticulously curated libraries, the top notch lecture halls at Tadbir building and hospitality at Noor Dormitory, all help to serve that very purpose. In my one year of stay here at MUI, if there's one thing I have truly observed is the kindness, love and humility from the people of Iran. The journey to this point was no fairytale at all and I have had my due share of hardships and you will too but a strong belief in Allah and determination to prove one's mettle reinforced and backed by a strong support system of teachers at MUI and administrative staff at Tadbir building will serve to overcome them. In the end, I would like to congratulate all the new aspirants, hope you would have an amazing time here.

“

**Bahawal
Farooq**

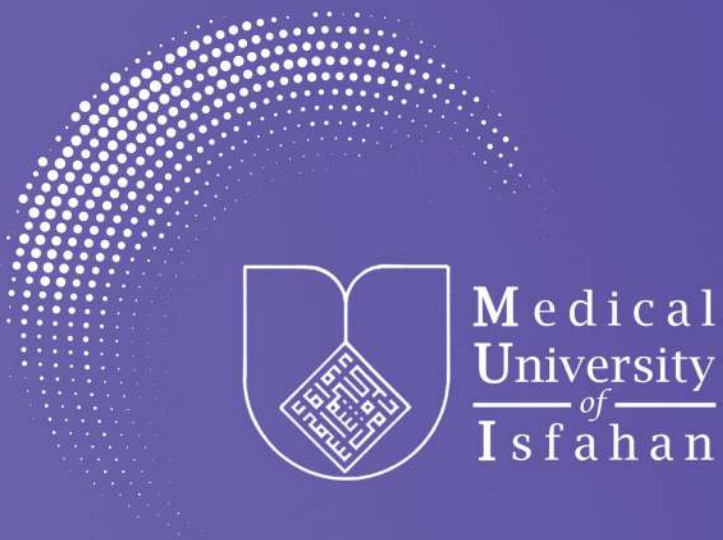

”

The journey of my dream has started from MUI. I have been a student of MUI during this time I have sat through more than my share of commencement speeches I experienced a very good friendly atmosphere, the faculty members are really a good mentor they guide and help us in each and every stage being first international batch we are served with best quality of education, I feel very privileged to be a part of this university they created very beautiful memories which are unforgettable many events were organized. A grand welcome party was also organized in which we were delighted. Besides this new year party was also organized in which we enjoyed each and every part hosted by University! And in the last note I want to thank the faculty for giving us best quality of education as well as organizing events which bring out the best inside us!

“
